

SystemEssentials Spam Firewall

The SystemEssentials Spam Firewall delivers powerful, easy to use, and affordable enterprise-class spam and virus protection.

Email has undoubtedly become a key tool for communications among companies worldwide. However, with frequent virus attacks and the alarming rate that spam has been filling up inboxes, email is quickly becoming a less efficient means of communicating. It's time to take control of spam.

The SystemEssentials Spam Firewall is an integrated hardware and software solution that has the power of an enterprise-class solution, and the ease-of-use and affordability that businesses of all sizes demand.

Powerful, Enterprise-Class Solution

Designed by a team of veteran networking engineers, our Spam Firewall is a powerful, enterprise-class solution, supporting both small and large companies with the ability to process and handle 20 million emails each day. Its architecture leverages open source virus and spam solutions, in conjunction with ten defence layers:

- Denial of Service and Security Protection
- IP Block List
- Rate Control
- Virus Check with Archive Decompression
- User-Specified Rules
- Spam Fingerprint Check
- Intent Analysis
- Bayesian Analysis
- Rule-Based Scoring

This architecture optimises the processing of each email, which yields the performance required to process millions of messages per day. Unlike other software solutions, our Spam Firewall reduces the load placed on the email server by off-loading both spam and virus filtering.

Easy to Use and Maintain

With no software to install and no modifications required to existing email systems, installation is extremely easy, typically taking only five minutes. Reports, statistics and graphs are also widely available.

Energise updates are automatically retrieved by our Spam Firewall, enabling maximum spam and virus protection while eliminating administrative overhead

Affordable

The SystemEssentials Spam Firewall is affordable for businesses of all sizes - small or large. There are no upfront costs or annual renewal costs – the only charge being a small monthly subscription to cover your domain users. This makes it the most affordable enterprise-class spam and virus protection solution available.

Powerful, easy to use, affordable.

Key Features > Comprehensive Protection

- Spam Filter
- Virus Filter
- Anti-Spoofing
